Personal Link (Portfolio) : <https://self-portfolio-if15.onrender.com/>

## Career Objective

As a passionate and self-motivated Full Stack MERN Developer, I have a strong foundation in HTML, CSS, and JavaScript, along with experience in modern frameworks like React and for Backend like Node.js, Express.js and MongoDB. During my academic projects, I focused on creating responsive and user-friendly web applications, ensuring an optimal user experience.

## Education

- B.tech in Computer science and Engineering, MAKAUT University  
Passing Year : 2026 CGPA TILL : 7.2
- Higher Secondary (12th), Rishra Vidyapith School, 2022 | Percentage: 83.4%
- Secondary (10th), Rishra St.Thomas Academy, 2020 | Percentage: 73%

## Technical Skills

- Programming: C, Java, Python
- Web: HTML, CSS, Java Script , React , Node.js , Express.js
- Database: MySQL, MongoDB
- Framework: Bootstrap ,Angular , Vue.js ,Tailwind CSS
- OS: Linux
- Tech tools : Git, GitHub and Docker

## Major Projects

### Job-Pilot AI – AI-Powered Career & Job Search Platform | Final Year Team Project

Job-Pilot AI is a full-stack AI-powered career platform that enables job discovery, resume building, ATS optimization, interview preparation, and application tracking. Contributed to frontend development, backend integration, authentication, AI chatbot integration, cloud deployment, and production optimization.( <https://jobpilot-livid-omega.vercel.app/>)

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, REST APIs, Google OAuth, GitHub OAuth, Vercel, Render, Git

- Developed responsive Dashboard, Login, and core application pages with a mobile-first approach, ensuring seamless performance across desktop, tablet, and mobile devices.
- Designed and implemented interactive dashboard modules, including Resume Builder, Job Applications, ATS Optimization, Intelligent Matching, Interview Preparation, Practice Tests, Branding Toolkit, Recruiter Access, Salary Guidance, and Career Scorecard.
- Integrated frontend components with backend REST APIs for authentication, user profile management, dashboard data, and job application workflows.

- Implemented and integrated the Caddie AI Chatbot to provide real-time career guidance, platform assistance, and user support.
- Integrated Google OAuth and GitHub OAuth authentication, resolving callback routing, redirect URI, and production login issues.
- Configured Vercel SPA routing, eliminating refresh-related 404 errors through rewrite rules and fallback generation.
- Resolved production deployment issues by fixing CORS, environment variables, frontend-backend communication, Render deployment configuration, module resolution, and build scripts.
- Collaborated using Git/GitHub to merge team contributions, resolve conflicts, and maintain production-ready deployments.

## Others Project

- A full Stack Web-Application for tracking and managing Stock portfolio with virtual money, built with React, React-Router (Client Side Routing), Tailwind CSS for styling, Axios for HTTP Client, Chart.js for Data Visualization, Node.js for run time, Express.js for Web framework, MongoDB for Database, JWT for Authentication and bcryptjs for Password Hashing.
- Built a modern full stack event management application with real time updates, built with React, Node.js, Express MongoDB and Socket.io.
- Built a full-stack web app to search, compare, and save mutual funds using React, Node.js, Express, and MongoDB. Implemented JWT auth, bcrypt security, and real-time data via mfapi.in. Deployed on Vercel (frontend) and Render (backend).
- Developed and deployed a full-stack web application using React, Node.js/Express, and PostgreSQL, featuring JWT authentication and geospatial hazard reporting with Leaflet.js. Utilized Docker Compose for containerized development and deployed on Vercel and Render.
- Developed a real-time video conferencing application using React, WebRTC, and Socket.io. Enabled multiple users to join video calls, chat, toggle camera/mic, and share screens. Focused on responsive design, seamless peer-to-peer video streaming, and user-friendly interface.
- Built a ChatGPT-like application from scratch using the MERN stack and OpenAI API. Implemented real-time chat, message history, and dynamic responses from the AI model.

## Certifications :

- Attended Google GEN AI Bootcamp 2025.  
(<https://certificate.hack2skill.com/user/genaivolunteers1/2025H2S05GENAIB-V100011>)
- Case-o-mania – unstop 2025. ([https://unstop.com/certificate-preview/922b5441-47dc-46f8-8635-abd0b256cc62?utm\\_campaign=site-emails](https://unstop.com/certificate-preview/922b5441-47dc-46f8-8635-abd0b256cc62?utm_campaign=site-emails))
- Merit Certificate in the Young Turks – India's largest Skills Contest on Naukri Campus.  
(<https://certificate.hack2skill.com/user/genaivolunteers1/2025H2S05GENAIB-V100011>)

## Extracurriculars :

- Member of Coding club, SKFGI
- Organizer in Techfest 2025

## Declaration

I hereby declare the above information is true to the best of my knowledge.
